

# Color Plus

## Colour additive for water-based primers and lacquers

Concentrated colouring additive to be added to water-based primers and lacquers to correct their shade. Available in two versions:

White – to naturally whiten light woods in order to obtain an untreated look, particularly effective combined with "natural" or very opaque finishes;

Antique – to warm the wood shade imitating the colour of the solvent-based finishes.

Finishing

## Color Plus

### Technical data – 20 °C, 60% H.R.

Aspect	Coloured liquid
Density	1.050 - 1.200 kg/litre
Dosage	100 g per 5 litres of product (~ 2%)
VOC	0
Tools Cleaning	Water
Storage	12 months in sealed containers – Frost sensitive
Packaging available	100 gram bottles

### Instructions for use

Shake well before use! Color Plus can be added to any Tover water-based primer or finish, the amount of use is 2% or a 100g bottle every 5-litres of lacquer, do not exceed! If necessary, apply several coats. In the case of two-component primers or lacquers, first mix the two-component product and then add Color Plus. The monocomponent products already additivated can be used for about 24 hours, the two-component products within the limit of use (pot-life) of the chosen product.

Color Plus Bianco - The product is recommended for light woods, in which it whitens the wood shade and gives a natural untreated look. We do not recommend its use on dark woods as it could cause colour overlaps. The best results are obtained with very matt finishes. We do not recommend its use with natural effect lacquers either, such as Essenza or Uniqua Natur, as it would get an excessively intense effect with the risk of veiling and overlapping.

Added to a two-component water-based lacquer, Color Plus is indicated for application on Tintoretto white colour, to enhance its shade.

Color Plus Antico - This version gives the wood a warmer shade, similar to that obtained with solvent-based lacquers, also useful in the case of laying new wood next to an existing one already darkened by time.

Do not use Color Plus Antico with natural effect lacquers such as Uniqua Natur or Essenza.

### Notes

Shake well before use

Frost sensitive

Always carry out preliminary tests to evaluate the final aesthetic aspect

Apply evenly to avoid color overlaps

Do not exceed the recommended quantity, if you need a more intense effect, apply several coats.

### Safety regulations

Product for professional use. Strictly comply with what is stated on the label and consult the safety data sheet before using the product.

### Disposal

Dispose of the unused product and empty packaging in accordance with the provisions of the local legislation in force.

The recommendations in this technical data sheet are given for information only and do not bind our responsibility in any way since the methods and conditions of use of the product are beyond our control. We recommend checking the actual suitability for the intended use.

Rev 01 – 17/03/2020 This technical data sheet replaces the previous one.
