

MS Polymer adhesives

High performance, **solvent free**

TOVER[®]
Your formula

TOVCOL MS TOVCOL MS START

Mono-component **MS polymer** adhesives

Tovcol MS and Tovcol MS Start are two of the major products by Tover in the field of **eco-compatibility** and **bio-construction**. Solvent and isocyanate free, their formulation contains secure plasticizers.

They guarantee **the best performance in laying** both engineered and solid wood up to a width of 200 mm. Suitable also on heating subfloors, they do not need any adhesion promoter even when applied on non-absorbent subfloors. Furthermore, these adhesives are very easy to clean.

TOVCOL MS

Suitable for engineered wood and solid wood up to 200 mm width.

TOVCOL MS START

Suitable for engineered wood and solid wood up to 140 mm width.

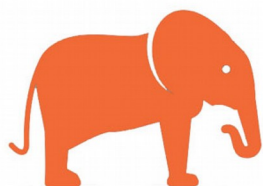

4.000.000 m²
